

## COLOCATION FOR PRODUCTION AND DISASTER RECOVERY

Maximize your cost savings - up to 70%

### Considering a Colocation Facility?

Increasingly, organizations are recognizing the benefits of colocalizing their mission-critical equipment within an off-site data center. Colocation offers significant benefits through economies of scale (large power and mechanical systems) and the advantage of time and cost savings that can be realized as the result of using shared data center infrastructure. With IT and communications facilities in safe, secure hands, telecommunications, internet, ASP and content providers, as well as enterprises, enjoy less latency and the freedom to focus on core business.

With budgets getting tighter and service level expectations growing, now is the time to consider alternatives while realizing substantial cost savings.

### Why Should You Consider a Colocation Facility?

Cost efficient Colocation facilities in California, and Montana, with a cost savings potential of up to 70%.

In Montana, one of the lowest electrical power costs in the US with excess capacity (approximately .07 cents per Kwh)

- Not affected by either man-made threats (terrorist strikes, industrial catastrophes, etc.) or major natural disasters (floods, earthquakes, tornadoes, hurricanes, power outages, tsunamis, etc.).
- Untapped bandwidth thru multiple dark fiber networks
- New State of the Art Hosting facility (2008) designed with redundancy throughout (power, cooling, connectivity, etc)

In California, the Colo is on a separate power grid, which has never been interrupted.

- 160 Watts per Sq. Ft Power Density
- N+1 Electrical Infrastructure
- N+1 PowerWare UPS Systems
- Power: Non-Profit, Low Cost, Anaheim Public Utilities
- Power Provider for Disneyland
- Emergency Power: N+1 Caterpillar 2500kVA Generators
- 16,000 Gallon Fuel Reserve
- .... And much more

### Our Services Make the Transition Smooth and Efficient

Our services can include:

- Managed Services (Remote Monitoring & Management)
- Relocation Services
- Multi-Vendor Support
- Professional Services

**Transition Assessment**  
*Fixed Price Service consists of a one-week assessment with an Architect, Systems Engineer and Project Manager. Service includes workshops, interviews and planning exercises.*

#### Deliverables

- Business Justification
- Recommendations Presentation
- Summary of Systems Analysis

#### Security

- Multiple layers, 24x7x365
- Intrusion detection systems
- CCTV cameras
- Biometric access

#### Network Connectivity

- Carrier Neutral
- Diverse fiber entry points
- Connectivity to multiple carriers
